

Engraving Chemical for screen printing

CSK S-66 Diazo type Photo emulsion for flat screen textile printing

Economically type water resistance emulsion, designed for textile printing industry.

CSK S-68 Diazo type Photo emulsion for flat screen textile printing

Industry standard water resistance emulsion, excellent durability, designed for textile printing industry.

CSK S-69 Diazo type Photo emulsion for flat screen blue Ray engraving

Fast expose, excellent durability, can special use for flat screen blue Ray engraving.

CSK OPT-W One component Pre-sensitized photo emulsion for water resistance textile printing

No need sensitizer, fast exposing, long shelf-life, environment friendly.

CSK CTS DLE-W One component Pre-sensitized photo emulsion for water resistance

Ultra fast exposing, can be special use for CST DLE DMD technology flat screen engraver machine.

CSK W-1200 Diazo photo emulsion for water resistance

High solids content and high quality, superb resolution and excellent durability.

CSK W-1400 Diazo photo emulsion for water resistance

High quality, easy to reclaim, smooth and tacky-resistant emulsion surface.

CSK S-70 Diazo photo emulsion for solvent resistance

Industry standard solvent resistance, designed for all type solvent based ink printing.

CSK S-72 Diazo photo emulsion for solvent resistance

High quality, fine details and halftones, complete solvent resistance.

CSK S-76 Dual cure Diazo photo emulsion for solvent resistance

Outstanding resolution and definition, used by electronic products as PCB, LCD, etc. and Dots printing.

CSK SW-80 Dual cure Diazo photo emulsion for solvent and water resistance

Completely solvent resistance and water resistance, Stencil are easy to reclaim.

CSK SW-86 Dual cure Diazo photo emulsion for water and solvent resistance

Completely water resistance and solvent resistance, Stencil are easy to reclaim.

CSK OPT-W One component Pre-sensitized SBQ photo emulsion for water resistance

Ultra fast exposing, can be special use for CST DLE flat screen engraver machine.

CSK OPT-SW One component Pre-sensitized SBQ photo emulsion for water resistance

Super High solids content, can be used in thick film applications and coated to 1000 micron.

CSK OPT-S One component Pre-sensitized SBQ photo emulsion for solvent resistance

Ready-to-use, ultra fast exposing photo emulsion with high solvent resistance.

CSK OPT-SK One component Pre-sensitized photo emulsion for making sandcarving stencils

Ready-to-use, ultra-fine and high resolution, highly sandcarving resistant, easy application for make sandcarving stencils for glass, granite, marble, ceramic and others. Also can make photo resist film.

CSK-960 One component frame adhesive

One component, ready-to-use, suitable for high tension stretching

CSK-930 Two component frame adhesive

Two component, excellent solvent and water resistance

CSK-MS One component hardener for stencil

One component, increases stencil's resistance.

CSK-AB Two component Super hardener for water resistance stencil

Two component, superior durability 100,000 times for long runs, highly resistant for reactive & all dye..

CSK-527 Protective Lacquer for water resistance stencil

Specially designed for blankets, towels, plush printing.

CSK Blockout Filler NO.1 (Red), **CSK Blockout Filler NO.2 (Blue)**

Rapid drying and easy to use, Excellent solvent resistant and print durability

CSK-33F Screen stencil remover liquid

Ready-to-use remove fast and thorough removal for direct emulsions

CSK-166 Retouching Lacquer for textile printing

One component lacquer for retouching, only for water resistance stencil textile printing

CSK-40 Screen cleaner for removing printing paste

Open dried-in image areas print runs and remove printing pigments which block the screen

CSK- T & GT table adhesive

Two component table adhesive for textile printing

CSK- INKJET 600 Ink for inkjet screen engraver

Suitable for A'tex, DOSUN, ZUND, CST, ICHINOSE inkjet flat screen engraver system.

CSK-98B Liquid photoimageable etch resist

Designed for metal acidic etchant applications.

Engraving chemical for rotary screen

CSK-9805 Photo emulsion for rotary screen

High viscosity and high solid contents, Excellent adhesion to screen for low mesh count.

CSK-9806 Photo emulsion for rotary screen

Medium viscosity, Superb resolution and Excellent adhesion to screen, designed for most mesh count.

CSK-9807 Photo emulsion for rotary screen

Medium viscosity, superb resolution and excellent durability. designed for high mesh count.

CSK-9809 Photo emulsion for Blue Ray UV laser Screen engraver

Specially designed for Blue Ray UV laser, fast expose, good develop strength and excellent durability

CSK-9810B None-sensitizer photo emulsion for rotary screen

None-sensitizer, environment friendly, fast exposures for DLE, extremely fine halftones and detail.

CSK-9810A None-sensitizer photo emulsion for rotary screen

Ultra fast exposing, can be special use for CST DLE DMD technology Rotary screen engraver machine.

CSK-9802 Two component Endring adhesive

Glue metal endrings to nickel rotary screens.

CSK-253 One component Endring adhesive

Glue metal endrings to nickel rotary screens, ready to use, no need mix hardener and long shelf-life

CSK-33R Liquid stripper for photo emulsion before polymerization

Stripping the photo emulsion before polymerization

CSK-35 Liquid degreasing for rotary screens

Degreasing and cleaning the new rotary screen, Improve emulsion adhesion on screen .

CSK-52 Retouching Lacquer for rotary screen

One component lacquer for retouching, before or after polymerisation

CSK-30 Liquid for removing endrings

Stripping the endring adhesive from endring, for re-use the endring.

CSK-40 Screen cleaner for removing printing paste

Open dried-in image areas print runs and remove printing pigments which block the screen

CSK-43XS Thermoplast adhesive extra strong

Excellent adhesive power, highly water and printing pastes resistance.

CSK-32 Liquid stripper for photo emulsion after polymerisation

Stripping the photo emulsion after polymerization or printing, safe and Environmentally friendly.

CSK- INKJET 650 Ink for inkjet rotary screen engraver

Suitable for A'tex, DOSUN, CST inkjet rotary screen engraver system.

CSK DIGITAL BLUE RAY UV LASER ROTARY SCREENS ENGRAVER MACHINE

Finest image with high speed (4-6 min / Meter) at low cost, directly engraving by light without any media

CSK high quality auxiliary material for screen printing

STORK quality standard Rotary screen, Endring, flat screen mesh, magnetic roller and other parts.

CSK INK FOR INKJET DIGITAL TEXTILE PRINTING

Characteristic:

CSK Digital Textile Reactive Ink

CSK Digital Textile Pigment Ink

CSK Digital Textile Disperse Ink

CSK Digital Textile Acid Ink

Printhead available: EPSON, FUJIFILM DIMATIX, StarFire1024, SEIKO SPT, KYOCERA, RICOH, KONICA MINOLTA etc.

Application :

The CSK textile ink is for roll to roll fabric printing or DTG printing, which is suitable with almost all kind of fabrics, such as garment, home textile, home decoration, shoe materials, bags, inside and outside decorative cloth, art reproduction, etc.

The data in this brochure was valid at the time of publishing, and is subject to change without notice. CSK reserves the right to modify its products at any time without further obligation.
